The Gift of *Hope* This Mother's Day

There are many couples who long for a child, but are unable to conceive. They are not alone.

Recognizing this desire, Catholic Health Services (CHS) invites women to reach out in hope to the Gianna of Long Island Center for Women's Health and Fertility based at CHS's Good Samaritan Hospital in West Islip to learn more about our services, including Restorative Reproductive Medicine.

At Gianna, we offer new, natural women's health care that seeks to identify the source of infertility and address it so conception can occur naturally. This method has proven highly successful, even for women who have tried other methods.

Please call Gianna today at 631-376-3232

(FertilityCare Bulletin Insert)

New, Natural, Fertility Care.

Navigating family planning and fertility care education can be difficult at times, leaving couples uncertain and frustrated.

At Gianna of Long Island Center for Women's Health and Fertility based at Catholic Health Services's Good Samaritan Hospital in West Islip, we offer weekly courses on fertility care education with the Creighton Model FertilityCare System™ to assist couples in gaining greater understanding of a woman's fertility and infertility in each cycle.

Women are taught how to observe and track signs of fertility each month in a standardized, scientific way that removes any guesswork.

This is a new, highly effective, evidenced-based model of family planning.

Couples can use the system to achieve pregnancy, avoid pregnancy, space children or monitor a woman's cycle.

Please call Gianna today at 631-376-3232
